

WAVE 7 Go-Live Update

August 17, 2023

Transport Ticket to Ride

The Transport Ticket to Ride (T2R) automatically prints on the designated department printer for Transporters to pick up when they are transporting the patient. The nurse should review and sign the T2R when they confirm the patient is ready for the Transporter. The document serves as a snapshot of the patient's current clinical condition and would be used by the ancillary department while the patient is in their care. It's also used in the event of an emergency when the patient is in Transport and not under the care of their care team. ([T2R Tip Sheet](#))

The T2R process is an approved RDG decision and standard across all TogetherCare Epic sites. The document will continue to print unless an SBAR is approved to modify the Epic build.
